

STEP 1.

No element on left side of 7, so no change in its position.

STEP 2.

As $7 > 4$, therefore 7 will be moved forward and 4 will be moved to 7's position.

STEP 3.

As $7 > 5$, 7 will be moved forward, but $4 < 5$, so no change in position of 4. And 5 will be moved to position of 7.

STEP 4.

As all the element on left side of 2 are greater than 2, so all the elements will be moved forward and 2 will be shifted to position of 4
